

Shreyam Kanaujiya

Full Stack Developer | Java • React • JavaScript

Kanpur, Uttar Pradesh | 9118325458 | shreyam91183@gmail.com | [LinkedIn](#) | [GitHub](#)

Summary

Full Stack Software Engineer with 3+ years of combined full-time and freelance experience designing, developing, and maintaining Java and React-based applications across the SDLC. Delivered scalable features end-to-end, improving application performance, reliability, and usability across multiple releases. Strong experience in REST API integration, unit testing, CI/CD pipelines, and Agile delivery.

Technical Skills

Languages: Java, JavaScript

Frontend: React.js, React Hooks, HTML5, CSS3, Responsive UI Design

Backend: Java, Spring Boot, RESTful APIs, Microservices, Node.js

Databases: MySQL, PostgreSQL

Cloud & DevOps: AWS (EC2, S3 – Familiar), Git, GitHub Actions, Jenkins, GCP(familiar)

Build & CI/CD: Maven, CI/CD Pipelines, Source Control (Git)

Testing: Unit Testing (JUnit), API Testing (Postman)

Architecture & Design: Basic Solution Design, LLD Understanding, SDLC

Methodologies: Agile (Scrum), Code Reviews

Professional Experience

Freelance Full Stack Developer (Remote)—Jun 2024 – Present

- Delivered **12+ production-ready frontend features** using React and JavaScript, meeting **100% of agreed timelines** across client engagements.
- Designed and implemented a **reusable React component library**, reducing UI code duplication by **30%** and cutting new feature development time by **20%**.
- Integrated **15+ RESTful APIs**, optimizing client-side data handling and reducing average UI response time by **25%**.
- Implemented **role-based access control (RBAC)** at the UI level, preventing unauthorized actions and reducing security-related issues to **zero post-release incidents**.
- Owned end-to-end delivery for assigned modules—including requirement analysis, design, development, testing, deployment support, and post-release fixes—resolving **90% of reported issues within SLA**.

Junior Software Engineer | Cognizant, Pune (MH) — Sep 2022 – May 2024

- Contributed to solution design by analyzing **20+ user stories per release**, identifying dependencies, and proposing implementation approaches aligned with system architecture.
- Developed and unit-tested **Java/Spring Boot components**, achieving **90%+ unit test coverage** and reducing regression defects by **35%**.
- Integrated React-based frontend modules with backend services to deliver **10+ end-to-end features** used across multiple production releases.
- Performed **30+ peer code reviews**, improving code quality and reducing critical production issues by **25%**.

- Supported build and deployment pipelines using **Maven, Jenkins, GitHub Actions, and Git**, improving the deployment success rate to **99%**.

Full Stack Developer Intern | Cognizant (Remote)— Feb 2022 – Aug 2022

- Developed a **healthcare claims processing application** using Spring Boot and React, improving claim processing efficiency by **40%**.
- Optimized frontend rendering and SQL queries, reducing overall system latency by **50%** and improving page load performance.
- Assisted in automating CI/CD workflows using Jenkins and GitHub Actions, reducing manual deployment steps by **30%**.

Key Projects

Task Management System

- Designed and developed a full-stack task management platform used for **team-level task tracking**, improving task completion visibility by **30%**.
- Implemented **JWT-based authentication and RBAC**, ensuring **100% secure separation** between Admin and User roles.
- Built and exposed **15+ RESTful APIs**, improving API response times by **25%** through optimized request handling.
- Implemented frontend caching and robust error handling for partial failures, reducing perceived UI latency by **25%**.

E-Commerce Store ([HerbalMG](#))

- Built a customer storefront and admin dashboard using **15+ reusable React components**, reducing frontend development time by **30%**.
- Developed and integrated **20+ Node.js/Express APIs** for product, order, and user management, supporting **5000+ SKUs**.
- Implemented secure authentication and authorization using **JWT and RBAC**, eliminating unauthorized access incidents post-launch.
- Developed a real-time inventory synchronization mechanism, reducing manual inventory management effort by **25%**.
- Iterated on UI workflows based on user feedback, reducing order-management errors by **20%**.

Education

Bachelor of Technology (B.Tech.) – Computer Science

Pranveer Singh Institute of Technology, Kanpur | 2018—2022

Certifications

- React—Basic to Advanced (Hooks & State)
- Java Programming (Advanced OOP & Collections)
