Professional Summary

Frontend Engineer with 3+ years of experience building scalable and high-performance web applications using React, Next.js, and modern JavaScript. Specialized in developing reusable UI components, optimizing rendering performance, and integrating APIs to deliver seamless and responsive user experiences. Experienced in collaborating with product managers and designers to build intuitive, user-centric, and production-ready interfaces.

Professional Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS

UI & UX: Responsive Design, Performance Optimization, Reusable Components, Cross-Browser Compatibility

API Integration: REST APIs, JSON, Axios/Fetch

State Management: Redux / Context API

Backend: Java, Spring Boot, Node.js, REST APIs, Microservices

Databases: PostgreSQL, MySQL

Cloud & Tools: AWS, Git, Jenkins, GitHub Actions, CI/CD, Vercel

Relevant Experience

Full Stack Consultant (Freelance)

May 2024 – Present

- Built and delivered responsive e-commerce dashboards and business management applications used by 1K+ users, improving workflows like order tracking, inventory visibility, and payments.
- Integrated and optimized REST APIs to handle large datasets (10K+ records), ensuring smooth UI rendering and fast data-driven interactions.
- Led UI architecture by designing reusable component systems, improving maintainability and reducing unnecessary re-renders and improving UI performance by 20%.
- Collaborated with stakeholders to refine UI/UX flows, enhancing usability and overall user experience.
- Debugged and resolved UI performance bottlenecks, ensuring consistent experience across devices and browsers.

Junior Software Engineer,

Sep 2022 – May 2024

Cognizant Technology Solutions – Pune, Maharashtra

- Developed and enhanced UI components for enterprise internal tools, improving data visualization and streamlining user workflows for business operations across multiple modules.
- Worked on frontend-backend integration for large-scale systems handling high-volume data (10K+ records per cycle), ensuring efficient data flow and consistent UI rendering.
- Optimized application performance using techniques like memoization, lazy loading, and efficient state management, improving responsiveness and reducing unnecessary re-renders.
- Contributed to production-grade applications in the retail domain, supporting reliable feature releases and ensuring stable performance across multiple deployment cycles.

Selected Projects

JobPulse — AI-Driven Job Discovery Platform

- Built a responsive job discovery platform handling **1K–2K job listings daily**, improving job search efficiency and user engagement.
- Enhanced job relevance using AI-based insights, improving matching accuracy and decision-making experience.
- Optimized UI performance for large datasets, reducing load time and improving responsiveness.
- Improved API response handling and error states in UI, enhancing user experience during edge cases.

Task Management System

- Developed a collaborative task management interface, improving team productivity and task tracking efficiency.
- Implemented role-based workflows and secure API integrations for multi-user task operations.
- Reduced manual effort by 30% through intelligent data extraction and structured task workflows.

Education

Pranveer Singh Institute of Technology

Aug 2018 – Jul 2022

- Bachelor of Technology in Computer Science
